Profile

Recently graduated software engineer in 2025, motivated and highly organized, with experience working on various types of projects and mastering different programming languages and frameworks, currently seeking a job opportunity.

WORK EXPERIENCE

Software engineer internship, *Naxxum*

01/03/2024 – 11/2024

Lac2 tunis, Tunisia

- Designed and implemented Angular front-end components and .NET back-end APIs.
- Applied Clean Architecture and CQRS principles to ensure scalability and maintainability.
- Collaborated on database design and optimization to enhance performance.
- Participated in code reviews, debugging, and deployment within an Agile team environment.

Software engineer summer internship, *CERT*

01/06/2022 – 30/09/2022

Al ghazella - tunis, Tunisia

- Developed a Flutter mobile app ("Weather CERT") to visualize and monitor real-time satellite data.
- Integrated InfluxDB for time-series data storage and Firebase for authentication and synchronization.
- Designed a responsive UI and implemented real-time data visualization features.
- Improved app performance and reliability through testing and optimization.

Software engineer summer internship, *tunisie telecom*

01/06/2021 – 31/08/2021

Nabeul, Tunisia

- Created a JavaFX desktop application to manage and track interns efficiently.
- Designed the UI using SceneBuilder and implemented full CRUD operations.
- Connected the system to a MySQL database for persistent data management.
- Enhanced usability through intuitive interface design and validation logic.

EDUCATION AND TRAINING

end of secondary education, *High school dar chaaban*

15/09/2013 – 31/07/2018

Baccalaureate in Mathematics

nabeul, Tunisia

Level in EQF: 4 EQF level

Preparatory Engineering Cycle Diploma, *Preparatory Institute for Engineering Studies of Nabeul*

01/09/2018 – 31/07/2020

Scientific Preparatory Class – MP track (Mathematics & Physics)

nabeul, Tunisia

Level in EQF: EQF level 5

Software engineer, *ESPRIT*

01/09/2021 – 12/03/2025

Field(s) of study: Information and Communication

Al Ghazella - tunis, Tunisia

- Technologies: Database and network design and administration

- Software and applications development and analysis |

Level in EQF: EQF level 7

PROJECTS

BaseApp - Todo List Manager (.NET 6, Clean Architecture)

- Built a scalable and maintainable Todo List Manager using DDD and Clean Architecture principles.
- Implemented CQRS with MediatR, AutoMapper, and FluentValidation for clean separation of concerns.
- Integrated JWT Authentication and Swagger UI for secure and documented APIs.
- Followed SOLID principles to ensure long-term maintainability and flexibility.

Modern Developer Portfolio Website (React, Tailwind CSS, Vite)

- Developed a responsive portfolio website showcasing projects and skills.
- Implemented dark/light mode, animated backgrounds, and glassmorphism effects.
- Integrated Lucide Icons and Radix UI for accessible and elegant components.
- Deployed the site via GitHub and Vercel for optimized performance and accessibility.

SmartFarm (C + Glade)

- Designed and developed a Linux desktop application using C and Glade.
- Focused on modular architecture and interactive GUI components.
- Enhanced maintainability and usability through clean design and structured code.

Go_Rondo (JavaFX + Symfony)

- Developed a JavaFX desktop application and a Symfony web app sharing a MySQL database.
- Implemented CRUD operations, secure connections, and real-time synchronization.
- Designed user-friendly interfaces for both desktop and web environments.
- Ensured data consistency and system reliability across both applications.
- Symfony link

Business_Travel (Spring Boot, Angular, MySQL)

- Created a full-stack web platform to manage employee business travel requests and approvals.
- Designed RESTful APIs with Spring Boot and integrated them with an Angular frontend.
- Implemented CRUD features, authentication, and role-based access control.
- Improved workflow efficiency by connecting backend and frontend systems seamlessly.

Devops_Project

- Deployed the Business_Travel project using CI/CD pipelines.
- Automated builds, integration, and deployment through DevOps best practices.
- Improved team collaboration, delivery speed, and code quality across environments.

SKILLS

• Debug Software • Java • JavaScript • Bootstrap • React • MySQL • Firestore • tools: Maven, Postman, Swagger UI, JUnit • Azure Boards • Grafana & Prometheus • Visual studio • Machine Learning (ML) • Convolutional (CNN) & Recurrent (RNN, LSTM) Models • Cloud AI Services (OCI AI)	• Use software design patterns • Python • TypeScript • Symfony • Dotnet • MongoDB • RESTful APIs • QA Tools: Bamboo, Jenkins, Hudson, Selenium, Appium, SonarQube, JUnit, TestNG. • Jira • VScode • IntelliJ • Deep Learning (DL) • Natural Language Processing (NLP) • Data Science Basics	• HTML 5: HTML/CSS/JQuery • JavaEE • C# • Angular • Spring boot • InfluxDB • GraphQL • docker/Dockerhub • Vagrant • STS(Spring tool suite) • Linux • Supervised & Unsupervised Learning • Generative AI and LLMs • Responsible AI	• Tailwind css • JavaFX • Php • Flutter • Node.js • PostgreSQL • Git/Github • azure devops • Nexus • Netbeans • AI Fundamentals • Neural Networks • AI Model Evaluation
