Recently graduated software engineer, motivated and highly organized, with experience working on various types of projects and mastering different programming languages and frameworks, currently seeking a job opportunity.

skills

- **Programming and scripting languages:** C, C#,c++ ,java, javaFx , javaEE , Python ,Php , CSS , HTML , JAVASCRIPT ,JQUERY ,Dart, typescript,bootstrap,XML,YAML
- **Frameworks:** springboot ,Angular ,Symfony ,Dotnet ,flutter
- **databases:** Mysql ,Firestore(nosql) ,influxdb(cloud database nosql),mongodb
- **Software and tools proficiency:** Cisco , StarUml , Oracle , MySQL , codeblocks , Sts , Vscode , Vs studio , Netbeans , PhpStorm, ScreenBuilder , Eclipse , IntelliJ , Xampp ,Github ,Swagger ,Postman ,Firebase , Figma , Devops , Jenkins , Vagrant, nexus, DockerHub ,SonarQube, Grafana, Prometheus, azure devops
- **System operations:** Linux : Centos, Ubuntu / Windows

Internships

- jul-Aug 2021: Telecom I Nabeul
Worker Internship: Developed a desktop application (JavaFX and Scene Builder) to manage interns.
- jun-Aug 2022 CERT I Technopole., Tunis
Engineer Internship: Developed a mobile application (Flutter, Dart, Firebase, Firestore, InfluxDB) to manage water basins and handle real-time data.
- Feb-Sep: Naxxum I Lac2., Tunis
Final Year Internship (PFE): Developed an internal Team Planning application for the company (Angular, .NET, MongoDB, Azure DevOps). In this project, we created advanced generic components and implemented a CI/CD pipeline.

Projects

- Smartfarm:
Developed a desktop application on Ubuntu using C as the programming language and Glade for the application design.
link : <https://github.com/Farouk973/projet.c>
- Go_Rondo:
Developed a desktop application (JavaFX) connected to a website (Symfony) sharing the same database (PhpMyAdmin) to facilitate business operations.
(link javaFX:<https://github.com/Farouk973/GoRONDO>
link symfony : https://github.com/Farouk973/GoRondo_Seekers)
- Business_Travel:
Full Stack website project (Spring Boot backend, Angular frontend, and MySQL database) to facilitate business travel for employees from various companies.
link: https://github.com/Farouk973/pidev_business_travel
- Weather_CERT:
Mobile project with Flutter, Dart, and Firebase as the backend and Firestore and Real-time Database as the database, connected with InfluxDB cloud client (Android, iOS, and web) to help CERT manage water basins. Link: https://github.com/Farouk973/Weather_CERT
- Devops_Project :
We deployed the Business_Travel project using DevOps practices.
